Manufacturer Description

RAND Source 22 is a true powerboat for all nautical adventurers. With a sporty console, race pilot seats, utility deck, and social hangout areas, Source 22 is a highly flexible powerboat giving the opportunity to do anything you want on the water. Source 22 is the fastest electric boat on the market, with a leading green profile in production, making this boat extremely sustainable without compromise on power, comfort, quality, or fun.

The bow on Source 22 is the ultimate utility deck with a comfortable front exit and lots of space to carry equipment for water sports, diving, or other items for your destination such as bicycles or climbing equipment. Besides offering massive amounts of space, the utility deck is a great spot for fishing and can transform into a plush 170x160cm sunbed.

Source 22 represents a new approach to sports console boats using a new design language specifically developed for its segment. The design of RAND Source 22 is inspired by the dynamic curves and A-class surfaces familiar from high-end luxury sports cars. The exterior is a subtle play of shadows and taut surfaces, enhanced on the side by a new design element - the infinite loop. The new Source 22 is a testament to style, functionality, and raw performance enhanced by the brand's new game-changing design.

With every new model, RAND creates a unique hull, fitting the use-scenario for the specific boat. With Source 22, the hull design is all about speed and efficiency, that like a race boat are close to 4:1 in length and width, giving it both a sporty race look and performance. With its 22 feet, it's the perfect size for high-speed sailing, where the hull is designed to have the most comfortable and efficient speed at 28 knots with 30% less consumption of fuel and electricity - depending on the engine you choose.

As Source 22 is built for speed and adventure, it is equipped with comfortable racing pilot seats that help keep you in place when sailing at high speed. If you want to stand up while sailing, you can add the bolster to the pilot seats, which will keep you comfortable in place while sailing in a standing position.

RAND is dedicated to social experiences in a combination with luxury and comfort. Source 22 is no exception. The pilot backrest can flip forward to create a dining area for 5 people, the adjustable cockpit table can transform into a 200x140cm sun lounge with adjustable backrest to provide optimal seating arrangement for each social situation, and the utility deck can transform into another massive sunbed usability to provide the best experiences and companionship at sea.

Source 22 is equipped with two 1000 L storage rooms with massive space for watersport equipment and other things you need for your trip. As a part of the big storage rooms, an optional transportable cooler box gives the flexibility to carry cold beverages from your home directly to the boat and then further to the beach or other destinations you are heading to.

As an option, you can get a new innovative design feature with a hidden bimini top in the caf seating area. This gives you the flexibility to remove and add your bimini on the go, with an effortless two-step foldout process.

One of the innovative design features on the Source 22 is a hidden bimini top, built-in swim ladder, and tow mounts. The built-in swim ladder and tow mounts are part of the aft deck, that gives easy access for watersports and getting in and out of the water.
