DESCRIPTION

The new C44 is characterized even more by their elegance and sportiness. The new size windows also improve the light inside the cabins, the bathrooms and the main living room. The electric roof of the hard top which is made of glass to increase the brightness also in the cockpit. The restyling also includes new paintings and air intakes able to enhance the hull and the lines dialogues as well as the window shapes. The cockpit layout is available in two different styles: simple version with deck lounge, large sundeck and tender garage at the rear or the double version with two sofas in a L shape and a table comfortably seating 12 guests.

This well-designed electric hard-top offers excellent visibility. It has a large roof opening and an electric side window to the right of the wheelhouse, providing good ventilation for the cockpit.

The C44 was conceived By Sessa Marine to respond to the desire of those who want to live on their boat in an open area and to enjoy the company of as many friends as possible on board. The "double cockpit" option includes 2 salons with a U-shaped sofa and seating around a table for no less than 12 guests. With the "double cockpit" option, the aft salon can be quickly transformed into a large sunbed, even when under way, for those tanning moments. The version with tender garage offers a single lounge and large rear sunbed.

The lines, forms and the way space is defined are what have made the C44 such a success. Her new features have been added to respond to the needs of increasingly sophisticated and demanding customers.

The lounge is made up in wood, linens and leather - bright and warm, for a friendly, welcoming atmosphere.

Spacious and flooded with light thanks to the window with opening porthole, the large master cabin is an invitation to relaxation? views at eye-level.
